

MULTIBLOX SET 2

No matter how complex the scenarios in which technical assistance is required become, the accessories needed for this should not become excessive. A solution that drastically increases the utility value of existing systems makes the work of the fire brigade easier. Products are needed that can be quickly and safely adapted to local conditions, individual tasks and special requirements.

MULTIBLOX is the ideal modular system, offering a wide range of options to master any task. For quickly supporting accident-damaged vehicles and securing heavy loads, MULTIBLOX provides you with sufficient material for complete stabilisation.

When lifting loads, Set 2 provides a secure support up to a height of 520 mm.

MULTIBLOX complies with requirements M.6. and M.7. of DIN14800-18Bbl.13. and is therefore the only system that meets the requirements for car support and equipment material.

Product-ID	720102/ 720122
Weight	31,5 kg
Material	Plastic
